

ENGINEER – OPERATION AND MAINTENANCE

Company	Intertoll Norway / Intertoll Europe Group
Field	Inspection Maintenance
Job Title	Engineer
Type of Position	Permanent, full-time
Place	Bergen, Vestland
Application deadline	31.03.2024

Join us in operating one of Norway's largest and most exciting road systems!

We are seeking a skilled engineer within the construction industry like you, who want to use your experience and further develop your expertise in collaboration with skilled professionals across diverse disciplines.

As an engineer in Intertoll Norway, you will during the Sotrasambandet construction period be working together with Intertoll's international project development team, and after the operational phase starts in 2027, you will as a part of our local Norwegian team be responsible for ensuring that inspection, maintenance, and reporting are carried out efficiently, professionally and on time.

The position will be located at our project office at Sotra and later at Intertoll's operations and maintenance centre along the road system. Working hours will mainly be during daytime in the first 5 years of the construction period, and there may be some evening work during the operational period.

Main tasks in the pre-operational phase/mobilization phase (2022-2027):	<ul style="list-style-type: none"> • Be Intertoll's representative on a day-to-day basis • Assist with our mobilization tasks and the establishment of the operation and maintenance unit • Cooperate with the contractor and Sotra Link when necessary • Safeguard Intertoll's interests in design issues during the construction phase • Assist in the preparation of guidelines, procedures, and manuals for specific expert areas (e.g. bridge, tunnel, road surface, etc.) • Participate in work with ISO certification • Participate in the development of local supplier networks and negotiation with subcontractors
Main tasks in the operational phase (from 2027-):	<ul style="list-style-type: none"> • Assist the manager for operations and maintenance. • Perform inspections, maintenance, and reporting • Provisioning, implementing, and updating weekly, monthly, and annual maintenance plans • Participate in the rolling plan for heavy maintenance together with Sotra Link • Appropriate fault rectification according to contract service levels • Interact with electrical and mechanical equipment teams • Check inventory lists for spare parts and consumables

	<ul style="list-style-type: none"> • Develop work orders and oversee maintenance tasks. • Interact with the client and the client's subcontractors. • Ensure that Intertoll complies with its health and safety guidelines
<p>Preferred qualifications</p>	<ul style="list-style-type: none"> • Higher relevant education as an engineer or civil engineer. Relevant experience can compensate for the educational requirement. • Good competence in and experience with civil engineering, electrical and mechanical engineering, or other relevant disciplines • Minimum of 3 years' experience from operation and maintenance of transport infrastructure, preferably within bridge structures, but also within tunnels and road surfaces • Proficient with MS Office software • Good Norwegian and English written and oral presentation skills • Valid driver's license • Experience with on-site supervision of subcontractors
<p>What can we offer?</p>	<p>You will be an important part of a large and solid organisation, where personal and professional development is encouraged and supported. You will work with academically exciting and challenging assignments and different disciplines and get to participate in a project environment where you will collaborate with professionals who are among the foremost in their field.</p> <p>You will help build an environment and develop the organization before the operational phase starts.</p> <p>We can offer flexible working hours, partial home office and competitive terms. In addition, we offer parking, charging of electric cars and canteen in our premises at Sotra in the pre-operation phase. Eventually, we will move into our own purpose-built operations and maintenance centre.</p>
<p>About us:</p>	<p>Intertoll Norway AS started in Norway in 2021 as part of Intertoll Europe, a major operator, business developer and toll collector within infrastructure in Europe with headquarters in Budapest, Hungary. Intertoll is one of two main contractors for the prestigious PPP project RV55 Sotrasambandet, and Intertoll Norway will operate and maintain the road system for a minimum of 15 years after completion in cooperation with the Norwegian Public Roads Administration. Our office is located at Sotra in the heart of the road project.</p> <p>Read more about Intertoll on www.intertoll.no and www.intertoll.eu</p> <p>The Sotra connection is a major road project for the Bergen region. The turnkey contractor Sotra Link will build tunnels, bridges, viaducts, underpasses, pavements and cycle paths and four-lane roads.</p>

Intertoll started preparatory operations in 2022, and full operations will start when the project opens.
