

**Job Title:** Software Development Project Engineer (SDPE)

**Company:** Intertoll Europe ZRt.

**Location:** Budapest, Hungary

**Job Description:** Intertoll Europe is seeking a talented Software Development Project Engineer to join our dynamic team. The SDPE will collaborate with the Product Project Manager to develop and support a constantly evolving software application, developed in-house and deployed at Intertoll Europe's multiple international operations. The SDPE will liaise with end-users and management to enhance and optimize business processes embedded in the product, ensuring competitiveness in the company's future project development.

**Key Responsibilities:**

- Elaborate and craft user requirement specification documents according to the specific needs of new project deployments,
- Comprehend and architect operational business logic and workflows, including maintenance management integrated into the product,
- Decipher end-user demands, articulate them and facilitate their understanding for the software development team,
- Assist in the advancement and improvement of the application's features, keeping pace with technological progress,
- Scrutinize contractual compliance obligations and assure their incorporation into the product,
- Guarantee that the defined user specifications are fulfilled and executed promptly,
- Create and produce user guides for the product,
- Provide training for end-users on the application as well as ongoing assistance.

**Requirements:**

- Education: A degree in information technology, software development management, software engineering, computer science, or a related field.
- Experience: Proven experience of a minimum of 5 years in project management and software development.
- Estimation Techniques: Good working knowledge of project estimation techniques.
- Technical Knowledge: Excellent technical knowledge of Microsoft infrastructure and .NET.
- Leadership Skills: Good leadership, decision-making, and organizational skills.
- Communication: Strong communication and interpersonal skills in English, both written and oral.
- Travelling: Must be able to travel domestically and internationally.
- Class B driving license.
- Microsoft server infrastructure experience is a plus.
